

MyParts Part selection/management

**2008 PSMC
Conference**

MS2 at a Glance

- **Expertise in the Land, Sea, Undersea, Air, Near-Space Domains**
- **Complex Systems Integration**
- **Advanced Technology Sensor Products**

★ Line of Business Headquarters

Solving our customer's most demanding challenges

What is MyParts?

- **Engineering part search/selection tool**
- **Parts list (PL) / bill of material (BOM) editor**
- **Part pricing analysis tool**
- **Part/supplier collaboration tool**
 - **Infrastructure utilizes over 30 servers**
- **First production release in 2003**
 - **Many features added as result of user feedback**

Continuing to evolve as enterprise tool

Why MyParts?

- *Many legacy systems used by engineering*
- *Aggressive project schedules*
- *Sites had different set of tools/processes*
 - *Limited data sharing*
- *Part proliferation*
- *Enforce design approval process*

Single tool for part selection and management

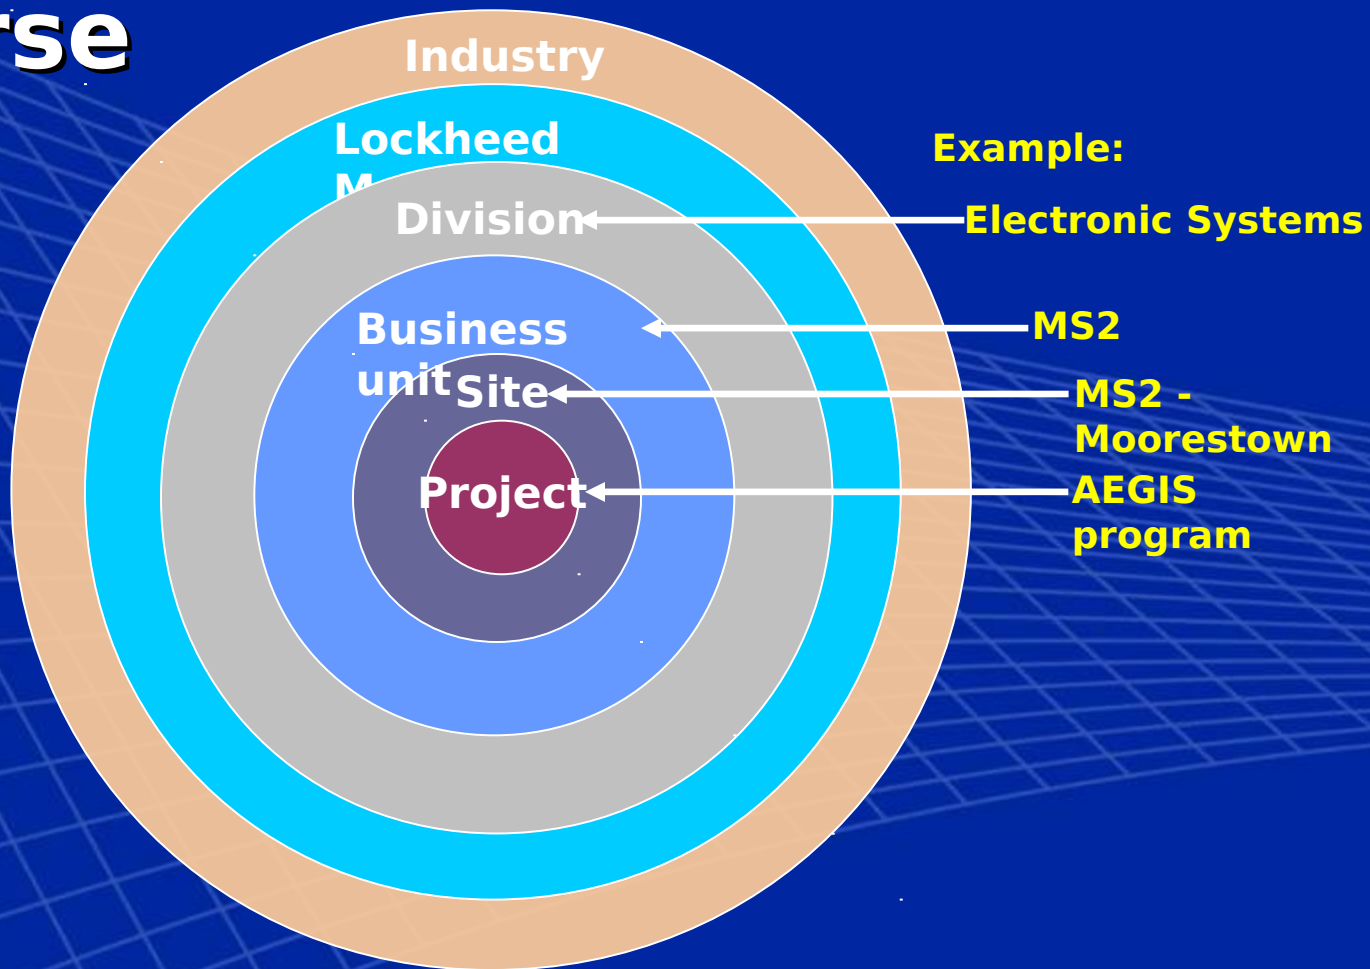

Engineering part selection

- *Program/project requirements*
- *Program/project approval*
- *Design requirements*
- *Component lead times*
- *CAD library models*
- *DMS cases*
- *Problem/engineering change history*
- *Preferred suppliers*
- *Sourcing agreements*

Many factors affect part selection

Lockheed Martin part universe

Goal is provide engineering with project-approved parts

MyParts benefits

- **Central access to engineering part data**
- **Decreased parts list approval time**
- **Online parts catalog**
- **Ability to view part/supplier data across corporation**
- **Common approach to part selection**
 - **Reduction in new part requests**

Integrated tool for part selection and management
